Front End Development Website Project

Purpose: To design, develop, and publish a Website Front using recommended design practices. Your website should contain a home page and Maximum of 3 pages content pages. You are required to create an external style sheet (.css file) that configures text, colour, and page layout for at least 1 page. Embedded CSS, or inline CSS, font tags, may be used should be used in at least one page.

Your project content pages should at least include the following:

1. One page containing a form with at least three elements
2. Appropriate meta tags
3. One page utilizing tables effectively
4. One animated image
5. One e-mail hyperlink
6. One external hyperlink
7. Consistent banner logo area
8. Consistent main navigation
9. Association with external style sheet (.css file)

Your website project should run on Website browsers, and it will be evaluated on the following criteria:

1. Project Milestones
2. Including all required web page elements
3. Visual appeal of site to target audience
4. Accomplishment of project's objectives

Project Milestones

- a) Web Site Topic: Using a word processor, prepare the following Website document to discuss your Front-End Website project Milestones. Your documentation should not exceed 10 pages and must discuss the following:
1. What is the purpose of the site?
 2. What do you want the web site to accomplish?
 3. Who is your intended audience?
 4. What opportunity, problem, or issue is your site addressed?
 5. What type of content might be included in your site?
- b) Planning Analysis Sheet: Using a word processor, write a Planning Analysis Sheet that includes the following headings:
1. Website Goal
 2. Describe the goal of your web site in one or two sentences.
 3. What results do I want to see?
 4. List the working title of each page on your web.
 5. What information do I need?

List where you will obtain the content (facts, text, graphics, sounds, video) for the web pages you listed above.

Question 2**(5)**

Site Map: Using a word processor, PowerPoint, or ruler and pencil, draw a flowchart (storyboard) of your web site that shows the hierarchy of pages and relationships between the pages.

Question 3**(55)**

Frontend Website Development: Using any open-source web development application create your sample websites project. Your website should clearly show the logo, navigation, content, and footer areas.

Present your web site to the instructor and class, explaining the purpose behind each page / group of pages.
